Advantages of visualization systems:

- Clearly arranged indication of actual filling levels
- Easy evaluation of the 4-20 mA output signal without process control
- Availability of filling levels on any computer with internet connection
- Simple installation and parameterisation
- VA-EI ... delivered finally parameterised

Visualization of continuously measured filling levels.

VB20

Web-Server

Indication of 1-8 actual filling levels on any network-compatible computer

Basic device

Choice of options

In- and output

Standard = 8 analog inputs, error signal
EA 8 digital inputs, 4 switch- and 1 diagnose output
